/ WORK EXPERIENCE

>> Back-End Developer

Dependent-Worker | 2022- Present Nuevo Siglo
https://www.nuevosiglo.com.uy/

My job has been to add software solutions for handling large amounts of data. My skills were put into practice in:
- - Development of big data ingestion processes.
- - Analysis and development of solutions to transfer legacy code to more current technologies (Monolith - Microservices).
- - Implementation of improvements in database structures.
- - CI-CD management with AWS and GitHub Actions

>> Back End Developer

Independent-Worker | 2021-2022 OCTADev
https://www.bdgtech.co/

I work as a Back End Developer developing API-REST robust. Perform tasks in Back End with Laravel, Nodejs obtaining good results and progress in projects with major clients in Latin America. My tasks are focused on :

- - RestFull API development
- - Development of good and readable documentation
- - Development of JEST unit tests
- - Working with SCRUM methodologies
- - Working with GIT- GITHUB and GITHUB ACTIONS
- - Technical Lead

>> Back End Developer
Depedent-Worker | 2017 to 2020
- I develop web applications with technology such Back End with Laravel, Nodejs.
- I work on the basis of the latest Javascript standards.
- My activities were mainly in the creation, refactoring and adding new functionalities to LATAM clients.
- Creation of reusable code (CLEAN CODE)
- Execution of unit tests (Jest - Cypress)
- Workflow based on Git Workflow (GitLab - Jira - Bitbucket)
- Working with AWS
- Adoption of agile methodologies
